

VOLT

INU

ABOUT

VOLT is an ecosystem aimed at being a one-stop shop offering DeFi products while bringing profits back to the native token to support its deflationary purpose.

Manage a treasury allowing holders to gain exposure to any asset's classes (altcoins, nodes, NFTs, staking/farming or even digitalized stocks) without having to invest into all these various protocols on their own.

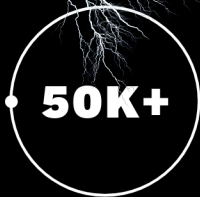

Offer a Decentralized Exchange allowing projects to get listed in a free and permissionless way and allowing them to become deflationary by burning their supply.

Develop an NFT collection giving exclusive access to future collections, to real world events & meetups as well as to exclusive rights and revenues within the VOLT ecosystem.
